# LETTER FROM THE EDITOR

For many of us in Northern California the news and newsfeeds are our first exposure to Ukrainian art and culture. The magnificent cities, sandy beaches and classic architecture seem like the perfect scenery for artists to flourish including those who practice the art of chess.

Tragically, as you are all aware, Ukraine is a country that is being forced to defend itself against invaders and millions of innocent Ukrainians are at risk of becoming casualties of war. Chess is a global community so in a show of support for our Ukrainian friends, I am sharing my favorite chess game and chess puzzle from the rich chess history of Ukraine.

**21. ♖d5!!!** One of the most brilliant moves  
 in the history of chess. White again offers  
 up his queen which can not be captured  
 while pinning the rook on f7.

**21... ♗f8** Again, black could not capture  
 the queen without being checkmated.

23. ♜g8! Black resigns here as 23... Kxg8 24. Re8+ Rf8 and 25 Rxf8+ is mate. Ukranian chess master Efim Korchmar's victory here constitutes one of the most truly beautiful games of chess ever played!

## To Win, White Must Promote a Pawn to a Bishop 5 Times!

For this issue I am sharing an absolutely brilliant puzzle as a tribute to the great chess problem composer Mikhail Afanasievich Zinar, who was Ukrainian. In my humble opinion, the two endgame study composers who mastered the pawn better than all the rest in history are Nikolai Grigoriev and Mikhail Afanasievich Zinar. And now as partial proof to this assertion, I present a puzzle by Mikhail Afanasievich Zinar first published in 1983.

We believe everyone, regardless of their backgrounds, should have equal access to opportunities, being it playing chess tournaments, or access to AI training.

We understand this is not happening today for many reasons causing disparity in many different ways.

We envision if there is a way to connect people together, a master chess player from Europe with a kindergartener from California, a research scientist in silicon valley with a high schooler from Mexico, ....., we create opportunities to level the playing ground and we will be one step closer to our vision - everyone should have equal access to opportunities!

# California has Got Talents!

## #1: GM Christopher Yoo

By FM Kevin Pan

Youngest National Chess Master at age 9, 3 years after he started chess.

Youngest International Master at 12 years and 2 weeks.

He is also the youngest Northern California State Champion – beating the record set by US Champion Sam Shankland, 2020 US Cadet Champion, ..... the list goes on.

On Dec. 12, 2021, a week before his 15<sup>th</sup> birthday, he gained 5.2 rating points in the historic Marshal Chess Club by defeating four masters and drawing one GM. In the short six months of the second half of 2021, he has achieved three GM norms from three prestigious events – the Memorial Day 2021 CCCSA GM Norm Invitational, the Labor Day 2021 CCCSA GM Norm Invitational, and the 2021 US Masters. With the 5.2 points he crossed 2500 FIDE completing all the requirements for the Grand Master title. Christopher Yoo has once again proved himself to be one of the greatest chess phenomena in California!

GM Christopher Yoo US Chess Federation

Are you wondering how he did it? Why did GM norms appear to be so “simple” for him? Can others replicate his success? I had the luxury to talk with him on zoom recently and see behind the scene of his success.

[KP] Christopher, thanks for taking the time and being with us today.

[CY] Thank you.

[KP] In a matter of six months, you accomplished something many people tried their whole life and couldn't do: three GM norms and 45 FIDE rating points from 2455 pre-Covid to 2500 on Dec. 12, 2021. How do you feel so far?

[CY] I feel great... Just the feeling of working that hard and getting GM is very special.

[KP] Yeah. All your hard work paid off right?

[CY] Yes

[KP] We can talk about rating all day long but at the end of the day chess is about the games themselves. Was there a game you particularly liked in the entire journey?

[CY] I am not...not particularly but I had a few must-win situations for my GM Norm that I managed to win. I think that's one of the things I am most proud about –

doing it in the must-win situation.

[KP] Right you didn't let the pressure gets to you...doing very well under pressure situations.

[CY] Yes.

[KP] Recently you were at the Marshall Chess Club, and you needed 5 points to get over 2500. As we talked about pressure, were you nervous when you were there?

[CY] I was a bit nervous, but I was also pretty excited. I think it was a mixture of emotions.

[KP] That was cool. So...how did you keep yourself composed during the games, or you just go along as usual as all other tournaments?

[CY] I just went along as usual.

[KP] Now let's talk about your overall chess journey. Your dad has kindly shared all the coaches you've worked with over the years. What are the main differences in your own experience, working towards NM, IM vs. GM? For example, as you worked towards NM you could've focused more on tactics... So, are there any differences in your training repertoire?

[CY] I think when I was working towards IM and GM, I needed a stronger opening [repertoire]. Up till about NM was mostly...playing a lot and tactics. I actually became more of an overall player, positionally, end game wise

and opening wise, for IM and GM.

[KP] That's a very good advice! Your chess journey seems so smooth to the rest of us. You managed to achieve a lot at a very young age. Was there any moment that you felt challenged or frustrated? How did you get over it?

[CY] I think there were a couple of moments. One when I hit 2000 but went down to 1900... I kept working hard and eventually the results started to go my way. The other time was during Covid. It was a little frustrating to not be able to play tournaments for one and a half years.

[KP] Right... all us chess players experienced that...

[CY] Yeah...

Christopher playing at a FIDE Hybrid Tournament in Jan 2022. PC Lin Wang

[KP] So what part of chess do you like the most?

[CY] I like the tactics. I am a relatively tactical player. I just enjoyed sacrifices and combinations, and the geometry of everything!

[KP] So is there anything you dislike about chess, or you love everything?

[CY] Mostly losing. There is hardly anything I dislike about chess.

## The Chess Files: The Answers are Out There

By James Eade  
 Eadefoundation.org

Is chess better off or worse off  
 in the age of the Internet and Chess  
 Engines? The answer is that it  
 depends. We cannot make a  
 blanket statement one way or the  
 other unless we agree on a value  
 system. Do we weigh technical  
 accuracy over the spirit of  
 competition? Or is it the other way  
 around?

How would these questions be  
 answered by a person who grew up  
 before the Internet age? How  
 would they be answered by  
 someone who grew up only  
 knowing chess in the age of the  
 Internet and chess engines? We  
 may never agree on a wide variety  
 of factors. Does that mean we  
 shouldn't try and answer the  
 question? Heck, no!

In the last issue we looked at the positive impacts, so let's look at the negative ones in this issue. Don't think I am being a grumpy old man. That's beside the point, even if true. There really have been some negative impacts.

The first one that occurs to me is the false sense of precision engines give us. What does plus point four really tell me? Is it actually better than point 3? Give me a break. Besides, what does it mean in terms of actually playing the game? Does it give me significant winning chances? It sort of detracts away from the relative strength of the opponents and doesn't tell me anything about whether the position is complicated or fairly easy to play for me.

Do I want a risky position that an engine indicates I am better but will be difficult for me to find the best moves? Do I want a quiet position where I am only a little better, but I know how to proceed? The engine is no help here, and if I am a slave to this false sense of precision, I will not be maximizing my chances. I was sick of opening preparation back in the 1970s! How deep do you have to go nowadays to be prepared? I want

to play chess moves according to my ability. I don't want to play chess moves that have been predetermined best by GMs or engines. OK, I had to learn to deal with opponents who knew the latest GM moves, but now I must deal with opponents who have the fastest engines and the biggest databases? What does that have to do with chess?

I want to play chess as early as possible. I don't want to wait to move 16 to start playing my opponent! I want to play my moves not someone else's. Of course, this is an idealized concept today. But so much preparation is not fun. It is work! It sucks the joy out of the game for me.

This type of preparation can mask a lack of understanding. Mechanically making the moves that have been predetermined as best can hold a player back from acquiring that deeper understanding. This is why I still like endgame studies. Yes, engines can solve those too, but I don't use them! I don't have to.

Yes, kids have coaches today (we didn't have them back in my day when we had to walk through two-foot snow drafts just to get to school! Oops, my grumpy old man is showing) and they can help them acquire the understanding that engines cannot give them. They really are better in all aspects than we were back in the day.

One of my biggest pet peeves is that engines allow wood pushers to think less of players such as Capablanca. So-and-so wasn't very good my engine says move 24 was a blunder! Sheesh!

José Raúl Capablanca wins in San Sebastián

There may be other downsides today, but I will finish with my last major complaint. World Championship matches are no longer must-see TV for me. Kasparov was involved in the last match I watched with much interest. The last truly compelling match, where I followed every move, was Kasparov-Karpov!

The games are mostly drawn and any new opening move is generally one that I wouldn't consider playing. A true chess fan such as myself is not riveted by the matches today. Granted, Carlsen might be the greatest player of all time, and the match conditions might play a role in leading to less

fighting chess. (Avoiding risks is more prudent than taking them.) Still, I used to anticipate these matches and found them to be compelling viewing.

I just don't find them as interesting now. I blame the age of the Internet and chess engines. Or, I could be just a grumpy old man!

The Eade Foundation wants to enhance chess literacy and chess excellence. Chess literacy means the ability to read and write chess notation. Reading notation opens the vast world of chess literature to the reader. Writing notation allows you to preserve your games for later study and to receive advice and counsel from other more advanced players. Chess excellence advances the state of the art and inspires others to achieve excellence on their own.

The Eade Foundation will provide chess sets and boards to organizations that cannot otherwise afford them. It considers chess to be a social good. Introducing or expanding chess literacy and chess excellence will lead to incremental improvement in any society. rival prestigious private school and 2015 National High School Team Champion **Harker School**. Dubai, here we come!

Can you imagine meeting the most legendary chess players of the modern era, playing the world's best players of your age, being interviewed live during a world championship game with half a million people watching, and representing the USA on the world stage, over a period of one week? I was fortunate enough to experience this participating in the final stage of the World School Chess Tournament from Nov. 23<sup>rd</sup> to Nov. 30<sup>th</sup> in Dubai, UAE.

The Spain Pavilion organized the World Online School Chess Tournament as part of Dubai World Expo 2020 with the goal to **promote chess as an educational tool among K-12 students**.

Around 300 teams from over 50 countries participated. The tournament started in 2020, and I teamed up with my eight friends and teammates from Mission San Jose High School, a local public high school in Fremont, California. After three phases of intense online competition over a year, **our team booked our place as the only US team among the 12 final qualifiers**. Along the way we defeated chess powerhouse and reigning National K-9 Team Champion **Dalton School from New York**, and across-bay area

## World Champion Encounter

Before we began battling it out on the board with the best schools of the world, we explored the various activities around the Expo and Dubai. The World School Chess Tournament coincided with the World Chess Championship with both held at the Dubai Expo. Our very first event was a photo shooting opportunity with world championship challenger GM Ian Nepomniachtchi. See how excited we all were to kick off an amazing week like this!

One of my team members was lucky enough to be chosen to ask the only question from the 118 participants to world champion GM Magnus Carlsen in his pre-game press conference. Ashley Pang proudly represented our team - "How do you apply the lessons you've learned in chess to your day-to-day life?" The reigning world champion chose decision making as the most useful skill - "... To be able to make relatively quick decisions based on the data that you have, which I think is useful in almost any endeavor!"

After meeting Nepo, all of us wanted to meet Carlsen. The world champion certainly didn't disappoint. He showed up together with GM Judit Polgar for a group photo with all participants of the World School Chess Tournament Final. It was amazing to see the best male and female players of all time in the same frame with chess kids from twelve countries, and all kinds of backgrounds including Christians, Muslims, Jewish and Hindus. Chess connects people!

A few days later at the playing hall of the world championship, our team got the chance to pose with GM Viswanathan Anand, the former world champion and 2022 world championship commentator. The chess pilgrimage is near complete!

## USA Pride

On Nov. 27<sup>th</sup>, the USA Pavilion hosted Team Mission San Jose High School. We were so proud to see our home country's showcase and how our innovation and technology has supported freedom and prosperity for all. Under a 1 to 1 replica of the Falcon 9 SpaceX rocket, we played a blitz tournament with GM Hans Niemann and NM Evan Rabin.

To top the whole experience off, we had a surprise visit by ..... GM Garry Kasparov! Now our chess pilgrimage is really complete!

What started at the chess board needs to end at the chess board!

There was no lack of superstars at the World School Chess tournament final stage. Most of the teams are from special chess schools including the famous Velanmal Nexus School from India boasting three GMs on the team! GM Gukesh Dommaraju headed their team at first board, with GM Rameshbabu Praggnanandhaa and GM Leon Mendonca on boards two and three. We knew the competition would be intense, but we were determined to put up our best.

Twelve teams were put in two groups and each team would decide rankings through a round-robin. The top two finishes from each group would compete for places 1 to 4 in the knockout stage, the next two for places 5 to 8, and the last two for places 9 to 12. Each game was played in a 20 minute 10 second increment time control, ensuring many surprises due to the relatively short time.

Being in the same group as Velanmal Nexus School and Saco

Oliveros, the final tournament winner and the runner-up, didn't make our lives easy. We didn't perform well in the group stage ending up at No. 5. We can blame it on not knowing that the board order doesn't have to follow rating, or the unfortunate moment when my opponent had an illegal move while at check with seconds left on the clock causing confusion

between me and the TD which flipped the game result, but in the end our best was simply not good enough. We did have our shining moments though. In our head-to-head encounter with Velanmal Nexus, our board 3, Nicholas Jiang, dragged his 700 points higher-rated opponent GM Leon Mendonca into 30 seconds remaining on the clock and lost with a lot of respect. Personally, my best game was the one I played against Savo Oliveros' board 1 FM Rojas Salas.

Going into the knockout stage,  
our jet lag had dissipated. Our  
spirits were up from the visit to the

determined to fight for our dignity!  
We beat Csanyi Alapitvany  
Gyermekekert from Hungary in the  
semi-final and Green Village  
Chess Academy from Israel in the  
final, ending up winning our  
bracket. Here is a game played by  
our board 2 Maurya Palusa that  
decided our final match against  
Green Village Chess Academy.

In the middle bracket, the two Mongolian teams School #1 and 33rd Secondary School, faced off. They drew their rapid match, then drew their first blitz tiebreak, and then amazingly drew their blitz tiebreak as well! They ended up sharing 3rd - 4th. On the other side, Velanmal Nexus School beat Saco Oliveros in the final and won the tournament while Saco Oliveros took second place in the world final. To many peoples' surprise, Saco's FM Rojas Salas beat Velanmal's GM Leon Mendonca. Here is my analysis of this interesting game.

The Eade Foundation supports building chess communities through enhancing chess literacy and chess excellence. An important part of this objective is encouraging young chess players which is why tournaments such as The Eade Foundation's Scholastic Chess Classics are an important opportunity for talented young chess players to represent their local communities with their own chess excellence.

Held on November 20, 2021, The Eade Foundation's Fall Scholastic Chess Classic attracted top young chess players from around the United States and, of course, a bunch of local talent from Northern California. This online Swiss Style chess tournament used the G/15+10 and was broadcast internationally for all to see on the popular Daily Chess Musings YouTube channel. Everyone who tuned in was treated to lots of excellent chess from talented young chess players and expert commentary from the tournament organizer and CalChess Journal Editor, Chris Torres. # Cal Wins Back-to-Back US Amateur Team West Championship

By Dr. Salman Azhar  
& FM Kevin Pan

USATW 2022 Champion Cal A Team. Left to right: NM Christopher Pan, Michael Franco, IM Kesav Viswanadha, NM Daniel Lin, Sadia Qureshi.

The ever-popular Amateur Team West Championship returned to in-person after going online last year, amid a global pandemic. After three days of intense competition, The Cal A team emerged as the ultimate winner taking home back-to-back wins for their school over two consecutive years. Over the board or online, Cal players proved themselves to be the chess powerhouse everyone in the chess world should watch out for!

Every year over President's day weekend, chess players around the nation would gather and participate in four editions of the National Amateur Team Championship at West, East (called World Amateur Team), North and South. The winning teams from all four regions will then come together and compete later in the spring for the National Amateur Team title.

Each team has four players and a couple substitutes are allowed. Every round four boards will compete and the team with the majority (2.5 points or higher) would win, and 2 points would lead to a draw.

This year USATW was held at the Juniper Hotel in Cupertino, CA in the heart of Silicon Valley. It drew more than 300 players across the open section and the scholastic section. College chess was very well represented in terms of both number of participants and strength. Cal and Stanford each sent two teams led by two strong IMs, IM Kesav Viswanadha and IM Bryce Tiglon, with many masters. Not letting the bay area take all the spotlight, UCLA and UC Davis also fielded strong teams led by National Masters. However, the top seed of the tournament was Mission 360, a local club with K12 students boasting an average rating of 2198. On the list there were also Team En Passant led by IM Timothy Taylor, seven teams from local scholastic club Learning Pawns, and a couple all girls' teams. This tournament is a great showcase of both the depth and breadth of bay area chess!

The first three rounds went by not without stress and excitement, however the pressure really built up at round 4, when the 2-day and 3-day sections merged.

Cal A (2173) was paired with top seed Mission 360 (2197), where intense games were expected. Stanford A (2177) was paired with the team You Sneeze You Lose (YNYL 1931), and everyone was expecting a smooth cruise for Stanford.

IM Kesav Viswanadha quickly took care of his business by beating FM Eric Li. Mission 360's board 2 FM Kevin Pan was able to beat Cal's NM Daniel Lin to even the score. After board 3 drew all eyes were on board 4 where two top women players faced off.

**13...Qf5 14.Nd2 Rb8 15.Nb3 Qg6 16.Qd4 Rb6 17.Rf2** [Now white has the perfect setup and black has very little play.]

17...Bf5 18.Nc5 h5 19.Re1 Re8  
 20.b4 Ra8 21.Re3 h4 22.h3 a5  
 23.Kh2 [Surprisingly, black has no way to infiltrate on the queenside so white continues with the plan of attacking the king.]

30.Rxf5! [Fortunately, white has this resource to maintain advantage.]  
 [30.exf6?? allows black to launch a brutal counterattack with 30...Re1+ 31.Kf2 Qxh4+ 32.R5g3 Rbe8 and white will have to give up significant material to avoid getting mated.]

23...Kh7 24.g4 hxg3+ 25.Rxg3  
 Qh6 26.Rfg2 g6 27.Kg1 Re8  
 28.h4 Rbb8 29.Rg5? [I regretted this move almost instantly after playing it.]  
 [I realized just a tad too late that 29.h5 right away was by far stronger, as there are too many threats for black to deal with and white is crashing through.]

30...gxf5 31.Nd7 [The knight creates several threats which are very difficult to stop. White will definitely be able to win the exchange back at the least, and black's center is likely collapsing too.]

29...f6! [I saw this move as soon as my hand let go of the rook on g5. Black strikes back in the center and it turns out that the white king is not so safe after all.]

31...fxe5 32.fxe5 c5 [An interesting defensive try which I missed over the board. Black attempts to divert the queen away from d4, which is key to the success of White's kingside attack.]

**35.Nf6+ Kh8 36.Rg5!** [This was essentially the final resource that I had to find. With this, black's hopes of either playing Rf4 or infiltrating with the queen are gone and white can successfully finish the attack.]

[36.Nxe8? Rf4! and white actually has to give up the queen to avoid getting mated, leading to a position that is likely drawn.]

**36...Rd1 37.Qf4 Qxf6 38.exf6 Re2+ 39.Rg2 1-0**

The weekend ended with lots of prizes given away. While Cal A took the title, Stanford A and YNYL got 2nd and 3rd place. UCLA took top college, Mission 360 took top Club, Proof School from San Francisco took top K12, TreacherousDevil took top K6, and The Checkmating Cheetahs took top female team. The U2000 section was won by Roasting Chestnuts on an Open Fire, U1800 by Knight's Fork, U1600 by Bishop Falcons, U1400 by Learning Pawn, and U1200 was won by, of course, We Are U1200 Team!

The USATW event was directed by Jordan Langland and assisted by IA Thomas Langland and NTD John McCumiskey. The event was organized by the Bay Area Chess, with chief organizer Dr. Salman Azhar.

Answer Puzzle 1:

Black should capture the d3 rook with the knight to avoid checkmate! Notice that white's queen cannot check black's king on a2, thanks to black's pawn on c4. The knight is also on a strong square too since the piece is controlling a lot of squares in white's territory. Capturing white's rook with the c4 pawn looks very tempting, since black will get a passed pawn and also attacks white's queen too! Surprisingly, capturing the white rook with the pawn leads to checkmate! Notice that once the c4 pawn captures the rook, then white's queen can check black's king on a2. Here is the line that leads to checkmate: 1...cxd3 2.Qa2+ Qd5 Black can also just move the king too. 3. Qxd5+ Kh8. (If 3...Kf8, then 4. Qf7 checkmate) 4.Nf7+ Kg8 5. Nh6 + This is double check since the knight and the queen are checking black's king at the same time. Therefore, black's pawn on g7 cannot capture white's knight on h6. 5...Kh8. If 5...Kf8, then Qf7 checkmate. 6. Qg8+ This move looks crazy since white's queen gets sacrificed. 6...Rxc8. Black's only move is to capture white's queen with the rook on b8. 7. Nf7++.

This is called Smothered Mate, which is a special checkmate delivered by the knight! Black's king cannot move anywhere! Tip: Learn the smothered mate pattern if you haven't done already.

Answer Puzzle 2:

White should capture black's knight with the queen to avoid checkmate, which is 1. Qxf5. If white's bishop captures black's knight, this leads to a checkmate in one by 1...Qxg2 ++. This is checkmate because white's rook cannot capture black's queen due black's rook on h8. Black's rook on h8 is pinning white's h2 rook to white's king. Therefore, white's h2 rook cannot move. Tip for beginners: In the opening and the middlegame, there are a lot pieces on the board. Overlooking a piece or pieces is easy to do. Before moving, spend time to pay attention to what pieces are on the same lines as the king and the queen. Be aware of what pieces are being pinned.

## About Lauren Goodkind

Lauren Goodkind was born and raised in the San Francisco bay area. She started playing in USCF chess tournaments in 1999 and has won and done well in local chess tournaments. In her free time, she likes to play tennis, do improv, play other board games, and travel. She hopes her work will inspire more girls and women to play chess since chess is a male-dominated game. She is also available for book talks.

# NorCal Invitational Online Championship

Sponsored by the Eade Foundation

By James Eade

For the second year in a row, the Eade Foundation has sponsored the NorCal Invitational Online Championship. Last year's winner, GM Sam Shankland, once again lead the field. This year, he had to settle for co-champion status, as both he and GM Stephen Zierk tied for first with 4 points out of a possible 5.

The total prize fund was \$1,000, as it was last year, but perhaps next year we will need to account for inflation! Judit Sztaray was the TD, as she was last year, and the commentators were GM Nick de Firmian and FM James Eade.
